

## SHARE Day Promises Great Fun on May 13

Volunteers needed to make the day special

**Gisela Darling**  
SHARE Day co-ordinator

This year's SHARE DAY (See How the Arts Reach Everyone) will take place on Friday, May 13, at the Andover Elementary/Middle School. This special day, which offers students workshops in art-related topics, crafts, sports, and music, brings community members into the classrooms to share their talent and hobbies.

As we do every year, we rely on the community's involvement to make this day a successful experience for all

students. We would like to encourage everyone to share their talents or interest and be part of this special day. Volunteers are needed to lead a two-hour workshop and/or assist with a workshop or help the lower grades with their activities

SHARE Day has been part of our school events since 1989, and we are looking forward to many more to come.

For more information, please contact Gisela Darling, workshop coordinator, at 735-5681 or SDarling@tds.net, or call the school at 735-5494.

Forms for signing up will be available at the school after the February vacation.

From December 7 to December 13, in celebration of Computer Science Education Week, millions of students throughout the world learned the basics of computer science. The Hour of Code is designed to inspire students of all backgrounds to consider a career in software engineering. Students learned the basic concepts of computer science using Blockly, a drag-and-drop programming tool, to generate executable code. Blockly is used to teach programming concepts such as loops and conditionals.

At AE/MS, all students in grades one through eight had the opportunity to code using themes of Star Wars, Minecraft, Plants vs Zombies, and Angry Birds. (In this photo, Dannicka Dlubac and Al Dudek take a quick break.) Students may explore more at Code.org, a Seattle-based non-profit dedicated to giving every student in every school the opportunity to learn computer science and expanding participation by girls and students of color.

## Geography Bee Returns to AE/MS

Cedar Kiedaisch advances to next level

**Jim Tucker, AE/MS social studies**

The Geography Bee has made a return this year to Andover. Eight geography experts of Andover Elementary/Middle School competed for the title of AE/MS Geography Bee Champion.

The competition began with every student in grades five through eight competing for a spot in the second round of the Geography Bee. With questions ranging from world geography to United States geography, the challenge for the students was at a very high level.

The finalists – fifth graders Helen Armstrong and Dominick McCord,

sixth graders Dana Buswell and River Turnbull, seventh graders Cedar Kiedaisch and Jim Clough, and eighth graders Will Furtkamp and Garrett Munson – faced each other head to head in front of a supportive audience of their fellow classmates. The final round was in the same open format as the preliminary rounds.

The students put forth a fabulous effort, and the competition was full of entertainment. In the end, seventh grader Cedar Kiedaisch rose through the ranks to win the final round and the right to call herself Andover 2015-2016 Geography Bee Champ.

The next step for Cedar is to submit an online test and hope she makes the grade to be selected to compete at the state level. AE/MS staff, students, and the Andover community wish Cedar "Good Luck!"
